## Bio

### Main areas of expertise

I have 6 years of experience in Android apps development using Java/Kotlin/MVVM/MVP/MVC, & iOS apps development using Swift and Team/Project Lead as well. 1 year of experience in developing Backend APIs in Core PHP and CodeIgniter. Now learning on React Native.

### Main tech stack

- Java: 6 years of professional experience
- Kotlin: 3 years of professional experience
- Android: 6 years of professional experience
- iOS: 1 year of professional experience
- Swift: 1 year of professional experience

### Jobs of interest

I'm interested in Senior developer jobs, where I work with my main technologies. I want remote jobs in any country.

## Experience

Senior Android Developer & Project Lead

04/2020 - 07/2022

TGI-Tabs Group International (Pakistan/Lahore)

2 years and 3 months

Gather module requirements from US based clients, conduct meetings on requirements, prepare design from designer, decide deadlines, manage team tasks on JIRA & Basecamp according to deadlines and deliver modules to clients.

Give daily training sessions to US team/clients regarding product flow and developed modules.

Do mobile development as well in a team.

Projects:

1. Drive safr — Uber clone project.

<https://play.google.com/store/apps/details?id=com.transport.tech.driver>

2. Ride safr — Safr is a new ridesharing service focused on the safety and empowerment of women. With unique features designed for and by women, we aim to improve lives through safe transportation, job creation, and financial security.

<https://play.google.com/store/apps/details?id=com.transport.tech.rider>

3. MP3 Downloader — Listen online and download songs, i have integrate soundcloud API.

<https://play.google.com/store/apps/details?id=com.mp3bucket.nextbrainapps>

4. Live Streaming - Developed LIVE STREAMING app LIKE/COPY "BIGO LIVE APP". Users can start Live streaming of his/her meetings, events, entertainment, and anyone can watch streaming online, commenting, gifts, likes, followers, followings, block users, chatting. Users can start group live streaming upto 3 persons. Users can see previous streamed videos of his/her fav user.

5. RTSP Player - I have played RTSP urls by customizing third party libraries. I have done work on playing Security Camera URLs in all types of mobile by changing in Paid Third Party.

6. Wallpaper Changes — Users can select wallpapers/images from gallery and select time then screen wallpapers will change according to selected time and pictures.

<https://play.google.com/store/apps/details?id=com.nextgen.wallpaperchanger>

7. CANVAS — User can select any picture from gallery and write quotation on it with change text color/size/placing/font options etc and share on any social media

Senior Android Developer

06/2019 - 03/2020

Elementary Logics (Pakistan/Lahore)

9 months

As a Senior Android developer. Understand all aspects(design, functionality, all use cases, DFD etc) of a project with TL and develop on time with complete QA. Solve my team member's project issues. Manage complete app security regarding apk decompile and data. Update/Upload apps on play store. Maintain code quality by using SonarCube. Manage projects in absence of TL.

Projects:

1. Tabeeb — This is basically for patients and doctors. Doctor app for tablets only from 7 inch screen to 15 inch screen and patient app only for mobile devices. Maintained app security on apk decompile and inputs data also. Real time live chatting. Not uploaded yet because it is still under development.

2. Flashcards — This is basically for students. This app works offline and we maintained app security in this regarding apk decompile because the first time the app downloads complete data from the server. Not uploaded yet because it is still under development.

3. Next Neighbourhood — This is a social media app like facebook. Posts uploading, events, surveys, commenting, likes, sharing, Real time live chatting same like whatsapp etc. Not uploaded yet because it is still under development.

4. Tasaheel Driver — This is a gas cylinder delivery application that is in English/Arabic language.  
<https://play.google.com/store/apps/details?id=com.agnitio.app.tasaheeldriverapp>

5. USI-TECH — This is a bitcoin application that is used by 70+ countries and developed 5 other apps similar to this.
